Intelligent dishwashers that adapt to different needs

Whirlpool's commitment to creative innovation has resulted in advanced dishwashers to suit your lifestyle and individual needs. Sophisticated sensors and intelligent programmes work in harmony to ensure perfect cleaning results every time.

6th Sense technology

6th sense Whirlpools **6th Sense** sensor control dishwashers deliver perfect results and can save you up to 30% in time, water and energy. The **6th Sense** sensors monitor the wash water identifying dirt impurities and adjusting temperature and energy levels to ensure perfectly clean dishes. The sensors stop the cycle as soon as the dishes are clean, meaning your dishes are done in the shortest time with the lowest energy consumption.

6th Sense 'One Touch' Programme

With the 6th Sense One Touch programme you do not need to select the temperature range you think is required for optimal cleaning. This advanced 6th Sense programme automatically senses the level of soiling and adjusts the cycle from 40 to 70°C to ensure perfectly cleaned dishes. All you need to do is press start, it is the perfect programme for the whole family – anyone can use it.

6th Sense Normal and Intensive Programmes

These two 6th Sense programmes enable you to wash your dishes within two temperature ranges. Ideal for every day use, the 6th Sense 40-55°C Normal programme is designed for a typically soiled load, while the 6th Sense Intensive 60-70°C programme cleans heavier soiled dishes. Both programmes deliver perfect results and can save you up to 30% in time, water and energy.

Auto sensor programme

Whirlpool's new Auto Sensor Dishwasher makes sensor control even more affordable. Perfect for daily requirements the Auto Sensor 50-65°C programme results in clean dishes with savings in time, water and energy.

Turbo clean

Whirlpool's Turbo Clean dishwashers provide perfect cleaning results on heavily soiled pots and pans. There is no need to pre rinse or pre soak, saving you a significant amount of time and effort. With Turbo Clean the water pressure is up to 70% higher in the lower rack, enabling you to clean heavily soiled items while also washing lightly soiled loads at normal pressure in the upper rack.

Overnight programme

Silent nights are never a problem with Whirlpools quiet Overnight programme. At only 39dBA this programme is perfect for apartments and families with young children.

OUTSTANDING PERFORMANCE THAT MAKES THE DIFFERENCE

Whirlpool has developed a range of innovative functions to make dishwashing safer, easier and more hygienic and give you the flexibility to ensure every load is washed in the right way so you get outstanding results every time.

Party glass programme

Party Glass is the special new programme for cleaning full loads of glassware including wine glasses. Combined with the Party Glass Holder accessory, it ensures excellent cleaning results and care of your glassware.

Anti-bacterial rinse™

Whirlpool's anti-bacterial rinse provides peace of mind for you and your family by ensuring that your dishes are hygienically clean. This special, 66°C high temperature, ten minute rinse kills 99.999% of all bacteria (independently tested to NF EN 13697 standards). This option is especially recommended if soiled dishes have been left in the dishwasher for a period of 2-3 days.

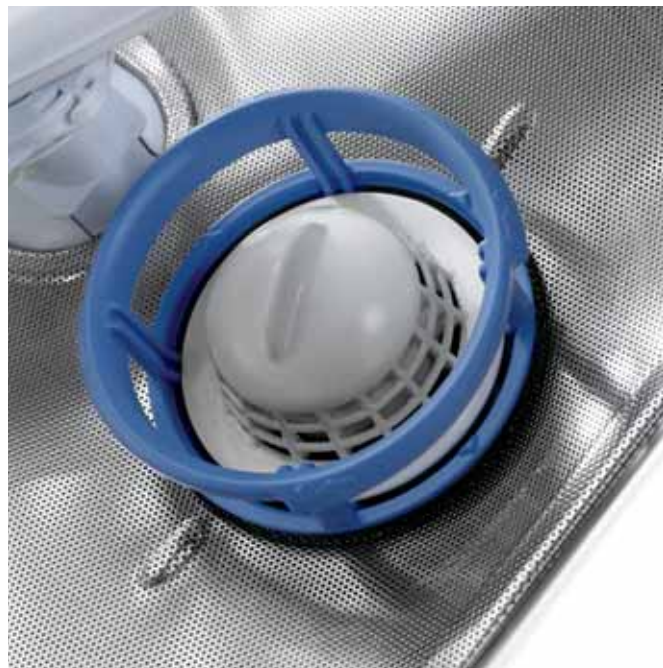

AutoClean

AutoClean is an innovative self-cleaning* filter system that guarantees superior dishwashing results.

(*A special soak and pulse cycle drains out all remaining particles at the end of each wash cycle to make the system self-cleaning).

Multi tablet switch

This special switch enables you to set the machine to the detergent tablet you are using. So you can use 4-in-1, 3-in-1 or 2-in-1 tablets (or even powder) to suit your personal preference and be assured of perfect cleaning results.

A SENSE FOR FLEXIBILITY IN SPACE MANAGEMENT

Whirlpool's smart spatial thinking not only creates more secure methods of holding small items and accommodating large items; it also allows you to treat the various areas of the dishwasher in different ways and run half loads, for better cleaning and energy efficiency.

Party glass holder

Whirlpool dishwashers adapt perfectly to your lifestyle, always giving you total cleaning control. With the new Party Glass Holder you can load up to 48 glasses in the dishwasher (24 wine glasses in the bottom rack using the Party Glass Holder, and 24 glasses in the upper rack) ensuring stability, care and perfect cleaning results. Flexible and easy to use it accommodates most kinds of stem glasses and is foldable so it can be simply packed away when it isn't required.

OPTI-flex™ racking system

Loading a Whirlpool dishwasher is easy and straight forward thanks to our highly adaptable OPTI-flex™ racking system. The lower basket has foldable racks which can be configured to provide optimum space for dishes and pans as required. Simply fold back some of the racks and you can create space for even your biggest items. The upper OPTI-flex™ basket also lets you make the most of available space to fit in tall or short glasses, bowls and cups. It also has specially designed flaps to hold long cooking utensils. High sides ensure that even small plates are held securely. The basket also has a big handle, so you can raise or lower it without effort to free up space where you need it most.

Spacious cutlery basket

This compartmentalised basket has slots to suit every type of kitchen cutlery. There is a dedicated section for spoons and a compartment for small items as well as two very useful larger compartments for knives, forks and cooking utensils. The ergonomically shaped handle makes loading and unloading safe and easy and gives you a stable grip for lifting the fully loaded basket.

'Multizone' half load

Whirlpool 'Multizone' offers you the convenience of washing half loads economically in either the top or the bottom basket ONLY. You can wash lightly soiled dishes like glassware in the UPPER rack or use the LOWER rack to take care of heavier soiled items like cooking pots and pans. Savings in water, time and energy can be as much as 20%.

Half load

This perfect everyday option allows you to wash small loads without worrying about wasting resources. You can load BOTH baskets only half full and save up to 15% in water, time and energy.

Extra large items

Our removable upper racks allow you to easily wash extra large items such as oven trays or large saucepans in the lower rack. Used with the Multizone lower rack option, this combination creates maximum efficiency with optimal resource use.

A SENSE OF INNOVATION IN DESIGN AND TECHNOLOGY

Practical and stylish, ergonomically simple but technologically sophisticated, Whirlpool dishwashers combine aesthetic and functional harmony in a modern, elegant design.

High quality design

With attractively soft, curving lines, Whirlpool dishwashers are built to last, combining good looks, robustness and a range of clever, labour saving features. Whirlpool doors are counter balanced to stay open in any position. Coloured touch zones on the racks make them very easy to load and the sturdy OPTI-flex™ rack structure holds even your most delicate dishes securely. Available in white, silver or stainless steel, Whirlpool dishwashers will enhance any kitchen design.

LCD display for constant feedback

The interactive LCD display updates you at a glance on the progress of your dishwashing, showing

- when **6th Sense** mode is operating
- which options are selected (through the icon display)
- time remaining countdown
- feedback on salt and rinse aid
- which rack is selected in Multizone mode
- washing phases (pre-wash, wash, drying)

DISHWASHER OPTIONS

6th Sense models

6th Sense models feature either 6th Sense 'One Touch' or two distinct 6th Sense programmes (6th Sense 'Normal' and 6th Sense 'Intensive'). As well as saving up to 30% water, energy and time, they make programming much easier because they automatically adapt the water temperature to the degree of soiling of the dishes.

Auto sensor model

Whirlpools new Auto Sensor Dishwasher makes sensor control even more affordable. The Auto Sensor 50-65°C programme results in clean dishes with savings in time, water and energy.

Classic models

Classic dishwashers are very easy to use. Offering up to 5 wash programmes they have simple, easy to understand controls, useful, functional features and are electronically controlled for efficient performance.

Slim line models

When space is a problem, Whirlpools new Slim Line Dishwashers provide the ideal solution. Fully comprehensive with a wide range of features, they are available in white or stylish silver.
